About

Victor Njogu, also known as Geekombe, is a visionary tech innovator and full-stack developer dedicated to leveraging technology to transform lives across Africa. With a foundation in software engineering from Moringa School, supplemented by self-taught knowledge, I've spearheaded various projects and startups like https://nexaproxy.web.app/ (Still Under Development) and https://www.techanics.co.ke/ (Yet to launch).

My goal has always been to make technology accessible and to democratize its access across Africa. This blend of formal education and self-directed learning underscores my commitment to leveraging technology for positive change. I also blend technical skills with content creation to make technology accessible and exciting for all. (Just search `geekombe` on your browser to see my work)

Skills

- **Frontend**: HTML, CSS, JavaScript, React JS, TailwindCSS

- **Backend**: Node JS, Python, Git, Flask, Firebase

Projects
